Subject: FW: FW: 22 wolves

> This is on the Big Hole, 22 wolves in one pack about 2 miles from
> the Cabin and Squaw Creek. Late January, 2010.
> Great news, the Montana Fish and Game won't have to feed elk this year, probably can't even
> find an elk in the valley, they will be scattered everywhere alive and
> dead.
> I wonder how many elk and moose a week it takes to keep this bunch going?
